OPTI PORT

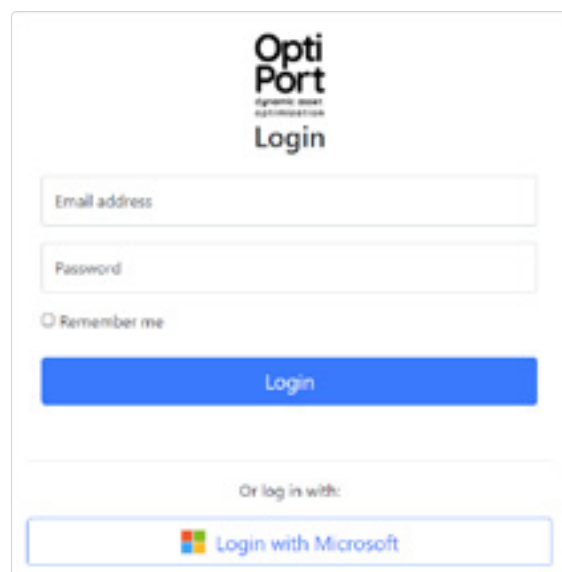

We are excited to announce the latest OptiPort updates, designed to elevate your user experience and streamline your operations. Our team has continued to work diligently to bring you new features and improvements that will enhance your experience and optimise efficiency.

1. MICROSOFT SINGLE SIGN-ON (SSO)

We are introducing a modern authentication method that allows you to log in to OptiPort using your Microsoft work account. This simplifies the login process, particularly for organisations already using Microsoft to manage user accounts. To enable this for your organisation, your IT administrator may need to approve the OptiPort application in the Azure Active Directory portal. This is a one-time action for the entire organisation.

Please note: This feature is available only for organisations using Microsoft for user management. If you require support for other SSO options, please contact us, and we will be happy to explore additional possibilities.

- HOW TO:**
- The next time you log in, click **'Login with Microsoft'** and use your work email to sign in.

The screenshot shows the OptiPort login page. At the top, it says 'OptiPort dynamic user authentication Login'. Below this are two input fields: 'Email address' and 'Password'. There is a 'Remember me' checkbox. A blue 'Login' button is positioned below the password field. At the bottom, there is a section 'Or log in with:' followed by a 'Login with Microsoft' button.

2. ANALYSIS LOADING SPEED INCREASED

OptiPort Analysis has significantly improved in speed, allowing you to analyse performance, fleet speed, jobs and fuel performance more efficiently.

HOW TO:

- Navigate to 'Analysis' tab on the left.

IMPROVEMENTS & FIXES

We have resolved several issues to enhance your experience:

- **Improved Live Map:** All berth definitions are now displayed as grey boxes on the live map.
- **Tug Timeline fix:** Resolved an issue where, in rare cases, the tug timeline would display more than 24 hours of data.
- **Improved notifications:** Enhanced the colour contrast of notification pop-ups.
- **Improved profile:** Refined informational messages on the profile & admin page.
- **Improved snapshots:** Streamlined browsing through historic schedules on the snapshots page.
- **Speed Improvements:** Enjoy faster loading times for Job Replay and Tug Timeline.
- **Analysis UI Enhancements:** Improved date selectors on the Analysis tab for a smoother user experience.

COMMITTED TO YOUR SUCCESS

We hope these updates enhance your experience with OptiPort and streamline your operations further. We are committed to continually improving our platform, and your feedback is invaluable.

For any feedback, please feel free to contact the KOTUG Optiport team via optiport@kotug.com

KOTUG is a leading international towage and maritime company. Driven by our passion 'Ahead in Maritime Excellence', we empower our clients and stakeholders with the complete portfolio. This includes designing, building, chartering, and operating vessels, training personnel, providing innovative consultancy services, and offering comprehensive procurement and logistics solutions on a worldwide scale. The company's expertise is divided across five pillars: Towage, Training & Consultancy, Intelligence, Subsea and Maritime Excellence. With roots going back as far as 1911, KOTUG is a family-owned company and trusted voice and partner of leading companies within the Maritime Industry.
